- [ ] **Open Chrome's security settings.** On a computer, select the three-dot More menu, then Settings, then Privacy and security, then Security.
- [ ] **Choose Enhanced protection if the trade-off suits you.** It turns on the new suspicious site warnings, Gemini scam checks and copied-command warnings.
- [ ] **Stay on Standard protection if you'd rather not share every address.** You keep warnings for known dangerous sites without sending Google the full address of every site you visit.
- [ ] **Never paste a command a web page tells you to run to fix an error.** Close the tab instead.
- [ ] **Consider Enhanced Safe Browsing for your Google Account too.** Google recommends turning it on for your account as well as in Chrome, which extends the protection to Gmail.
